

YANFLIX DUBBING STUDIO — RESTRUCTURE PLAN (DO NOT DELETE FILES)

CRITICAL RULES

Rule #1 — NEVER DELETE FILES

You are NOT allowed to delete anything.

Even if files appear:

- duplicated
- obsolete
- unused
- old Streamlit remnants
- experimental

they must be preserved.

If uncertain, move them into:

```
stale_python/
```

or

```
archive/
```

but NEVER delete.

Rule #2 — DO NOT CREATE A NEW PROJECT

The ONLY project directory is:

```
C:\Users\shani\OneDrive\Desktop\yanflix-dubbing-studio
```

You must perform all operations INSIDE this folder.

Do NOT create:

- yanflix-v2
- yanflix-clean
- yanflix-refactor
- yanflix-new
- yanflix-production

or any other duplicate root folder.

Rule #3 — MOVE FILES, DON'T REWRITE THEM

Preserve file contents.

Use:

- move
- rename

Avoid:

- recreate
- regenerate
- replace

unless explicitly instructed.

Rule #4 — Preserve Working Imports

If a moved file breaks imports:

Update import paths.

Do not duplicate files just to preserve imports.

TARGET PROJECT STRUCTURE

```
yanflix-dubbing-studio/
```

```
|— app/
```

```
|
```

```
|— components/
```

```
|
|— lib/
|
|— prompts/
|
|— workflows/
|   |— wf0_runpod/
|   |— wf1_discovery/
|   |— wf2_translation/
|   |— wf3_render/
|   |— n8n/
|
|— engine/
|   |— core/
|   |   actor.py
|   |   director.py
|   |   pipeline.py
|   |   llm_client.py
|
|   |— transcription/
|   |   transcribe.py
|   |   diarize_speakers.py
|   |   segment_lines.py
|
|   |— translation/
|   |   translate.py
|
|   |— synthesis/
|   |   synthesize_dub.py
|   |   dub_song.py
|
|   |— audio/
|   |   isolate.py
|   |   audio_fitter.py
|
|   |— rendering/
|   |   render_video.py
|
|   |— character_vault/
|   |   harvest_voices.py
|
|   |— services/
|   |   api_bridge.py
|   |   audio_processor.py
|   |   vault_manager.py
```

```

```

REQUIRED FILE MOVES

Move:

```
apply_scene_cast.py
build_wf1.py
build_wf2.py
build_wf3.py
run_diarize_ollama.py
test_models.py
```

into:

```
scripts/
```

Move:

```
app/api/api_bridge.py
app/api/audio_processor.py
app/api/vault_manager.py
```

into:

```
engine/services/
```

Move:

python_backend/*

into:

engine/

Preserve internal structure.

Move all old experimental code into:

stale_python/

instead of deleting.

JOBS RULE

The jobs folder stores ONLY:

- status files
- state files
- json metadata

No large media.

CACHE RULE

The cache folder stores reusable assets:

- embeddings
 - voice clones
 - model downloads
 - fingerprints
 - translations
-

WORKSPACE RULE

Workspace stores temporary episode assets:

- videos
- wav files
- stems
- transcripts
- final renders

Files in workspace may be regenerated.

FINAL REQUIREMENT

At the end:

1. Verify imports.
2. Verify API routes still function.
3. Verify no files were deleted.
4. Verify all changes occurred inside:

C:\Users\shani\OneDrive\Desktop\yanflix-dubbing-studio

ONLY.
